COCONUT MILK

World-renowned for their great taste, Thai coconuts have nutrient-rich fats that produce better-quality coconut milk. Our coconut milk products come from the Southern Thailand tropics where coconut groves thrive and local farmers practice organic and sustainable agriculture.

Our organic coconut milk is exclusively sourced from a dedicated pristine island deep in the Chanthaburi province, where coconut groves of special species called MAWA bear thicker flesh and higher fat content. This provides a suitable combination for the best quality coconut milk that has a rich and creamy texture, sweet aroma, and delicate taste.

No animals are used in any capacity for the collection or production of our coconuts.
